Deploy Your Full Stack App to the Decentralized cloud in 3 Clicks

Spheron

Hey Everyone, My Name is Prashant Maurya.
I am currently working as CEO and Co-Founder of Spheron Protocol, your one-stop shop for #decloudyourself. Before founding Spheron, I worked with multiple corporates from the healthcaredomain to customer data platforms and rigorously to understand infra and scaling infra.

But after starting Spheron, I know most things, be it marketing, sales, business development, coding, community management, treasury management, legal and whatnot.

Spheron

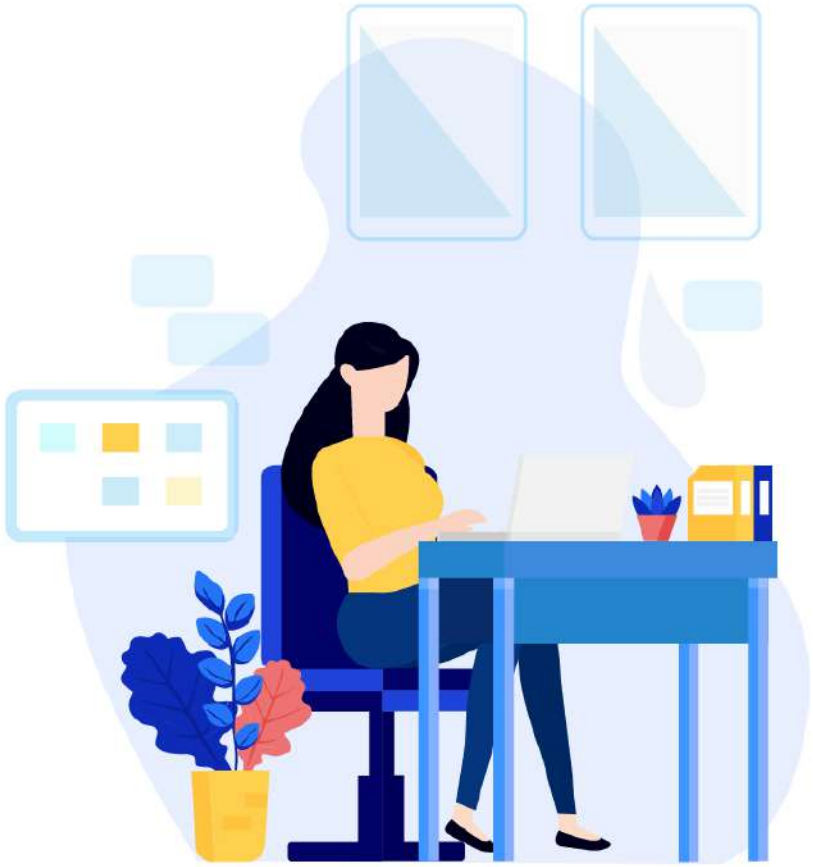
How To Know web 3.0?

- Read Papers of ethereum, Solana, polygon, zkSync and a lot more
- Try to grasp how these things are working together
  - Validator Node
  - Staking Nodes
  - Transaction Pools etc
- Listen to web3 native people talks,
- create questions and solve questions.
- Try to Understand Infra of web3.
- Listen to some web3 specific podcasts
- Understand community buildup and marketing
- Start using Twitter and follow people who you think are doing great in crypto

Spheron

How To Find Right Place In Web3?

- Analyse what you are good at
  Try to find some crypto founders and talk to them
- If you are a developer, try to contribute to Open source projects of web3
- If you are a marketer or sales, try to become part of the community and demonstrate your skills
- Apply for various programs running in web3 like ambassador programs
- Apply for multiple internships depending on your skills
- Google will not give all the answers to you. Try to talk to people in this space. They are accommodating



Spheron

How to Become Part of Web3?

Spheron

You are already a part now if you have done above two

THANK YOU

Spheron
